

The image shows a technical drawing of a rectangular object, possibly a component or a part of a machine. The drawing is centered on a white background. It consists of a main rectangular shape with a grid of lines inside. The grid is composed of 4 columns and 4 rows. The top row is divided into four equal-width cells. The second, third, and fourth rows are each divided into a narrow left column and a wider right column. The right column of the second row is significantly wider than the right columns of the third and fourth rows. The drawing is framed by four corner markers, each consisting of a short horizontal line and a short vertical line meeting at a right angle. The markers are located at the top-left, top-right, bottom-left, and bottom-right corners of the main rectangular shape.
